The Chair reported on the actions taken by the Bureau in the previous 12 months.

The bureau decisions can be found in the documents part of the FAI / CIA website

9 REPORT ON FAI ACTIVITIES

Mark Sullivan, CIA President reported on FAI activities and meetings and stressed the working together of the commissions presidents.

A lot of the time spend in the commissions presidents meeting is on finances.

The FAI is experiencing financial strain. A lot of NAC's are downgrading their membership and therefor pay lower fees. NAC's payments are very often late, creating cashflow issues. Russia is removed as a member, but was a big player within the FAI.

This results in more emphasis on creating budgets that are balanced. And following expenses and income more closely.

The CIA budget is not always balanced, but we have a good track record of investing for the future and creating a return on investment.

Markus Haggeney gives more insight in the FAI finances from the past up till now and how FAI has worked to cut overspending and get back into a positive financial situation. And gives some more insight in the effects of the financial challenges Mark was talking about.

He introduces the team that works at FAI. The new members communications employee Kamila Vokoun in specific. She is doing a good job in being a good teamplayer as well for NAC's as for Commissions.

10 REPORT ON THE 2022 FAI GENERAL CONFERENCE

The 115th FAI General Conference took place electronically from 1 to 3 November 2022.

The report was included in Markus his presentation on FAI activities.

Dayton, Ohio, USA**

11 DELEGATES REPORTS

Delegates were given the opportunity to give a verbal report on activities in their countries.

Everyone gave a short impression of the activities in their country in the past year. Most countries hold a national championship. Some combine their nationals event with another country.

Overall we hear activity in getting young pilots interested in competition although it does seem to be hard to keep the amount of competition pilots high. There is in overall a huge attraction to making money in ballooning commercially.

Statistics have been gathered for many years. The past years the gathering of the information has become harder. The secretary asked if there were people finding it important to keep gathering the information. Or if anyone would like to help find a way to gather information. There was no response from the floor.

14 EVENT DEVELOPMENT SERVICE SC REPORT

Lindsay Muir (UK): reported on the work of the SubCommittee. They reviewed 2022 events and reviewed the current sanction applications.

Sanction Applications to all events can be found in the documents on the CIA documents part of the website under Events, Events Sanction Documents.

There was a discussion about how to implement the request from Competitors SC to have a good balance between inviting as many countries as possible and the best competitors in the world. The minimum of 2 competitors in the first round as suggested to S1 is not the best way to go. The coming year we will look for a way to create a good balance.

Other thing that has been worked on for a while is an easier way to compile the information for the sanction application. NTSC suggested to implement this in WMF. **Attachment 7**

Motion 1: (2nd Germany)

We propose a motion to the CIA for CHF 3100 to invest in the development of an online sanction application management system in Watchmefly.

AX WORKING GROUP MINUTES

Uwe Schneider (GER):

The rules have been changed to reflect the recent changes in the General Section and S1. The reference has been corrected and where necessary the wording. We ask for approval of adjusting the rules so that they reflect the General Section and have them approved by the bureau.

There was a comment on the rules for dangerous flying and collision. It is important to keep in mind that we try to keep the fairness in our ruling. These are now indeed two separate rules that have the same doubling in place. There is no connection between these rules. Maybe in the future we need to look into this.

Motion 1:

To approve the changes to the AXMER as presented.

Info :

Rules with the adaptations to AXMER2023 will be checked by AX-WG and proposed to RSC for final approval. Plenary delegates power to bureau to approve the rules.

19 NEW TECHNOLOGIES SC REPORT

Claude Weber (LUX): Gave a presentation on NTSC work and the SubCommittee meeting and the financial situation of all the investments we made.

Attachment 22

There is a handbook for using Watch Me Fly for your National records. There is a handbook on how to use it that has been worked with in Germany.

Attachment 23

Last year there was a discussion on Balloon Live and WMF becoming mandatory for upcoming events. We decided that it should not be made mandatory in order to give developments the opportunity to grow. If a system that is better comes up and at that time an event with a different system is proposed, it is up to the delegates to vote in favor of something new.

The CIA would like to offer SC and WG cloud space on the FAI server so that documents don't get lost when people change. This will be easy accessible for all commission members. In order to sync the cloud documents on your computer you need an application that you can use with a license. When fully developed there will be assistance in how to use the cloud and how to sync.

New Technologies meeting minutes

Attachment 24

On a motion from the Chair the Report was accepted unanimously

Motion 1:

NTSC moves to accept the investment of AUD 3700 (approx. CHF 2250) to develop the pilot registration system in WMF.

motion adopted unanimously

Motion 2:

NTSC moves to accept the investment of CHF 1100 to acquire 50 licenses for the FAI Cloud sync client Mountain Duck for all WG/SC members.

Question from CZE: Do we expect additional costs in the future?
It is hard to predict. We can expect some updates but I don't think we will have to pay a full new fee to make use of those.

motion adopted unanimously

20 PUBLIC AND MEDIA RELATIONS SC REPORT

Debbie Spaeth (USA) held a presentation on the work of the PMR Sub Committee

Besides continuing it's work on articles PMR will this year be working on a more structured Social Media presence and on a website to honour our award winners and champions.

PMR also suggests working on a project similar to the Gordon Bennett TV for Hot Air.

Motion 1:

Request from plenary to discuss startup costs of Hot Air TV to be used in promotion of Hot Air Championship sanctioned by FAI Ballooning Commission with the bureau.

Discussion after the motion:

Concern is to allocate money without a return on investment. And we cannot let the bureau decide on budget items without approval of the plenary.

Some delegates would like to see a more detailed plan before allocating money.

The PMR SC explains that it is a work in progress that we don't want to let sit for another year to go by. This was started last year during worlds and we feel that this needs to continue with a little budget incentive in order to discuss with organizers what their contribution can be. With a long term perspective of it becoming self supporting.

After the discussion an amount was attached to the motion.

Motion 1 rewritten:

Request from plenary to discuss startup costs of Hot Air TV to be used in promotion of Hot Air Championship sanctioned by FAI Ballooning Commission with the bureau.

With a maximum of CHF. 1500

motion adopted unanimously

INTERNATIONAL YOUTH CAMPS

FAI MEDICO-PHYSIOLOGICAL COMMISSION (CIMP)

The CIA representative David Bareford (GBR) reported on the commission meeting. He points out that the commission tries to work on other medical requirements for AirSport.

FAI ENVIRONMENTAL COMMISSION

Steve Ireland said the commission has not been very active in a while. He does see some development in electrical aircrafts but there is not much going on in the commission.

FAI Secretary General explains that the chairman of this commission has resigned last year and has not been replaced since. Therefore there has not been much activity. He does point out that as airsports we do not put enough effort into showing what we do for the environment. He showed the existence of www.sustainability.sport. It is a website that features all sorts of efforts that are done in sports to improve sustainability. Airsports can also add their contributions. Not just individual athlete but also efforts from event organisers.

FAI EUROPE AIR SPORTS
